Client Studio

BRIEF TO APPROVED. · SOCIAL MEDIA MANAGER PLANNER

by KaelLabs

Welcome to Client Studio. Every client yes, *on record.*

Thank you for your purchase. You'll be inside your studio in about a minute. There's no account, no subscription and nothing to install: brief, content, approvals and reports in one private app.

On your computer

1. Unzip **Brief-to-Approved-Digital-Download.zip**. Move the folder somewhere permanent, like Documents. Don't open files from inside the ZIP.
2. Double-click **Brief-to-Approved.html**. It opens in your browser and works offline.
3. Bookmark it. Always open it the same way, in the same browser.

On your phone or tablet

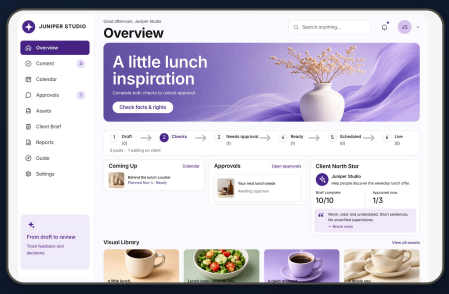

1. Tap **Open Client Studio Online** below (needs internet the first time).
2. **iPhone / iPad**: Safari → Share → **Add to Home Screen**. **Android**: Chrome → ⋮ → **Install app**.
3. Each device stores its own data. Move all client workspaces with a JSON backup.

YOUR PRIVATE ONLINE LINK

social-media-client-studio-2-online.vercel.app

Open Client Studio Online →

The same app, ready for your phone. Everything you enter saves privately in that browser on that device. Nothing is uploaded to any server or shared with KaelLabs.

Your first minute

1. **Overview**: the studio opens with a fictional practice client, Juniper Studio. Read **Here's your one next step**.
2. **Content**: open a post and tap **Run checks**. Tick Facts and Rights. Approval stays locked until both are done.
3. **Approvals**: select posts and tap **Preview review pack**. Print or save as PDF, then mark as sent. Use **Record decision** to log replies and **Versions** to see what was reviewed.
4. **Reports**: add reach and interactions; engagement rate calculates itself. **Print / PDF** to keep a copy.
5. **Start a project:** Settings → **Add client**, then fill in the **Client Brief**.

Desktop tip: press **⌘K** / **Ctrl+K** to jump anywhere. Avatar menu → **Switch theme** for dark mode.

The one rule: your work lives in your browser

Client Studio saves in the browser you use, on that device. **Use the same browser and the same file location.** Export a backup weekly and before clearing anything: Settings → **Export JSON backup**. Private browsing, cleared browser data or a lost device can erase work. Your computer and your phone are separate workspaces; they don't sync. Backups may contain client information, so store them safely.

Good to know

Client Studio by KaelLabs

What's inside

- **Brief-to-Approved.html**: the app, 9 views: Overview, Content board (6 stages, list or board, CSV export), Calendar, Approvals, Client Brief (10 fields), Assets, Reports, Guide & Templates, Settings.
- **Start Here**: this guide.
- **Documents/Client-Documents.pdf**: 6 A4 layouts: Welcome Packet, Client Brief, Strategy Snapshot, Content Review, Monthly Report, Project Handoff.
- **Documents/Editable-Documents.html**: type your client's details in the browser, then print or save.
- **Documents/Visual-Field-Guide.pdf**: 14 pages of workflows and checklists.
- **Documents/Spreadsheet-Companion.xlsx**: 5 tabs.
- **LICENSE.txt**: Personal use only.

Works with

Works in Chrome, Safari, Edge and Firefox on Mac, Windows, iPad, iPhone and Android. The spreadsheet needs Excel, Google Sheets or Numbers.

Troubleshooting

"My work is gone!"
You probably opened the studio in a different browser, moved the HTML file, or used private browsing. Open it the way you did before, or Settings → **Import backup**.

New computer or phone?
Old device: Settings → **Export JSON backup**. New device: open the studio → Settings → **Import backup**.

"Local save is unavailable"
The browser is blocking storage (often private mode). Export a backup before closing, then open in a normal window.

"Another tab changed this workspace"
The studio is open twice. Export from this tab, close it, then reload the other.

How do I print a report?
Reports → **Print / PDF**. Choose Save as PDF, A4, 100% scale.

Start over or see the demo again?
Settings → Reset: **Start empty workspace** or **Reload fictional demo**. Export your work first.

Does my client log in?
No. You record approvals you received by email or DM. It is a private record, not a shared portal or e-signature.

Record-keeping tool only. Client Studio organises your briefs, content, approvals and reports. Numbers come from what you enter; it does not connect to Instagram or any social account and does not post for you. Sample client, names and figures are fictional.

Thank you for supporting our small studio!

Client Studio keeps your content plans and review decisions together. Use it for personal projects and practice. **If it helps you, please leave an honest review on Etsy**. It means the world to an independent maker and helps other social media managers find a calmer way to work.

Etsy → You → Purchases and reviews → Leave a review
