brief to approved.
Content Studio

YOUR CLIENT CONTENT WORKSPACE

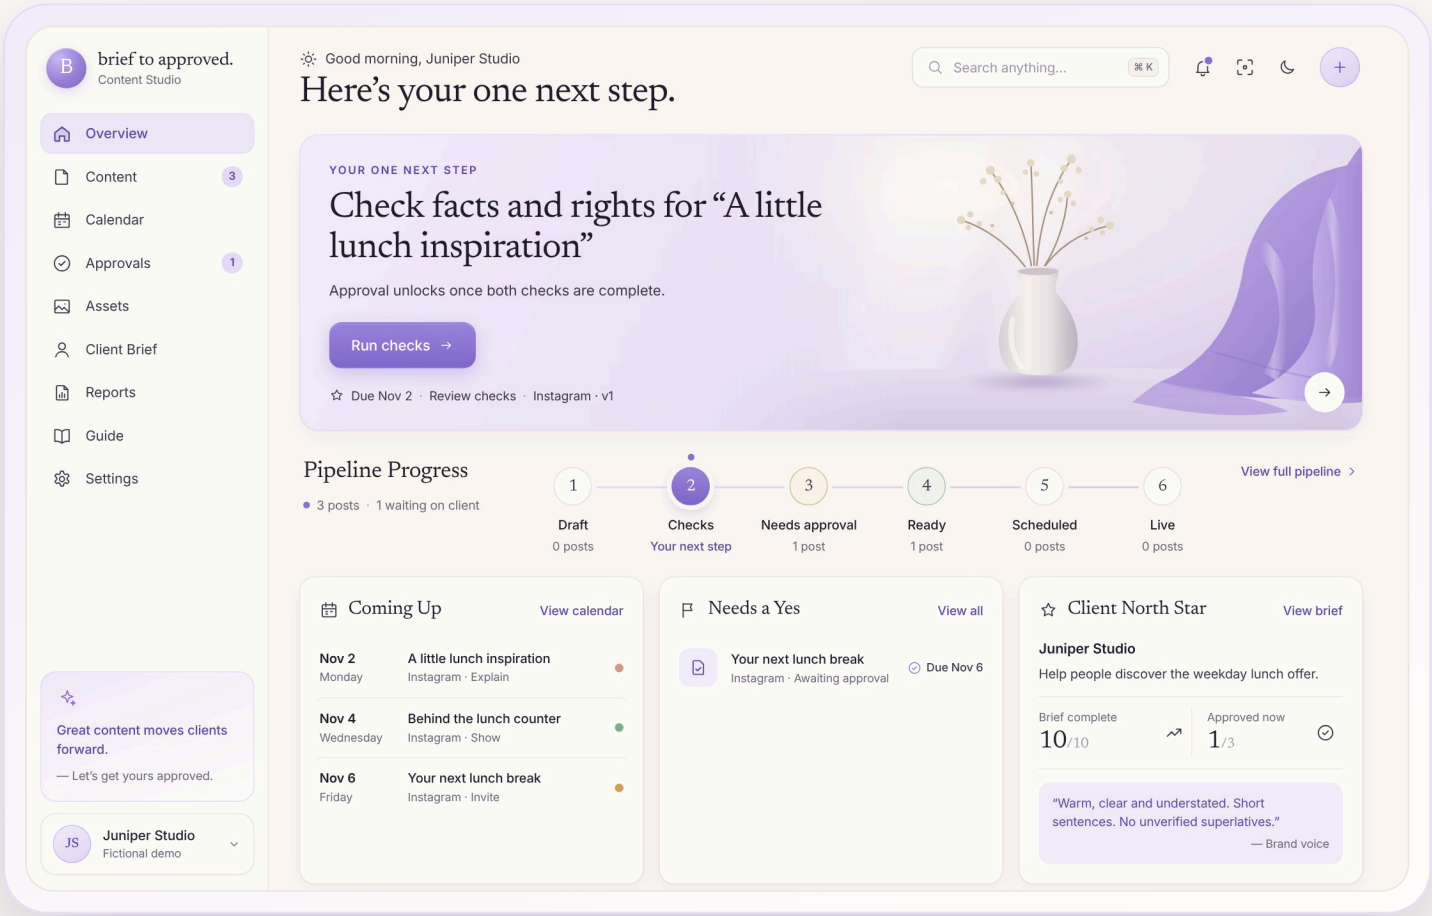

From first brief to *final yes.*

Brief, content plan, approvals and reports in one calm place.
Every post shows its single next step.

Open my studio →

Read the quick-start guide

Starts with a fictional practice client · No account needed · Export backups to keep your work

Actual app screen, shown with the included fictional practice client.

Plan with clarity

A client brief you can return to, content cards and a calendar coloured by stage.

Keep the right version

Fact and rights checks unlock approval. Editing approved copy creates a new version and asks again.

Finish thoughtfully

Post-level reports, printable client documents and JSON backups you control.

Everything in your collection

Client Studio	Overview, content, calendar, approvals, brief, assets and reports	HTML
Visual field guide	14 pages of diagrams, review checks and examples	PDF
Client document collection	Six coordinated layouts, from welcome packet to monthly report	PDF
Editable documents	Edit in the browser, then save HTML or print to PDF	HTML
Spreadsheet companion	Five-tab workbook with live task counts	XLSX

Your first ten minutes

1. Open the studio and follow “Your one next step” on the practice client.
2. Record a practice decision, then edit the caption and watch approval reset.
3. Export a backup, then start an empty workspace for your real client.
